MANAGEMENT AND LEADERSHIP

- ☒ Environmentally Preferable Procurement

We purchase 100% recycled copy/printer paper, as well as folders, envelopes, cleaning supplies, paper towels, toilet paper, tissues, and post-its. We also use recycled paper with soy ink for our stationary and business cards. Our beverages are primarily organic products as well (coffee, tea, etc). Wherever possible, we buy reused, recycled, and/or organic products.

WASTE

- ☒ Recycling

We recycle all paper, cans, bottles, and plastic via Baltimore City's recycling program.

ENERGY

- ☒ Renewable Energy

100% of the power used is generated from Wind Power through Washington Gas Energy Services ~500kWh per month used.

TRANSPORTATION

- ☒ Employee Commute

Owner walks to work daily (no longer owns a car) which cuts down driving by 3 miles per day (or more if owner worked farther from home).

- ☒ Efficient Business Travel

Travel to DC is done via the MARC train to Union Station, then the Metro system while in DC and Northern VA.

OTHER

Member of the EPA Green Power Partnership.
